Soil: calcareous and clayey marl

Wine training system: Archetto variation of Guyot system

Planting density: 3500 plants/ha

Grape harvest: October 4th - 12th, 1982

Alcohol content: 13.50%

Serving temperature: 18/20 °C

Technical profile

Harvest: Due to the prolongation of the winter the vegetative cycle started later than the average. The spring was temperate with some rainfalls during the month of May that hadn't caused any damages to the vine. The summer was hot and dry, as well as the month of September where hot temperatures created ideal conditions for a perfect maturation of the grape. **Winemaking:** regular fermentation and submerged cap maceration; racking off at the end of November. **Ageing:** one years in concrete vats and five years in medium-big Slavonian oak barrels. **Bottling:** end of April 1988.

Serving suggestion

Barolo Borgogno is one of the oldest Barolo produced following a classic and natural style. These precious bottles could have some sediment settled in the bottom, for this reason decanting the wine few minutes before the service is recommended.

Perfect pairing

We think it is wrong to recommend a "perfect" food - wine pairing, because everyone have their personal ideas and tastes. However we can suggest with whom it is perfect to drink this wine. With everybody!

Liste

Cannubi

Fossati

San Pietro delle Viole

It comes from all the estate's vineyards, five of the best Crus in Barolo area: Liste, Cannubi, Cannubi San Lorenzo, Fossati and San Pietro delle Viole. The first one, was born 11 million years ago from soil erosion, is composed by a completeness of micro and macro elements that combined together give to the wine peculiar characteristics of complexity and longevity. Cannubi and Cannubi San Lorenzo were born 12 million years ago from the sedimentation of the sea that occupied the Plain of the Po river, is the most famous and vocationed Barolo Cru. They have an amazing complexity of terroir, formed by marly-calcareous soil and a very favorable climate and they give origin to wines with distinguished characters of elegance and longevity. Fossati vineyard was born about 10 million years ago from the sedimentation of the sea that occupied the Plain of the Po river after the push of the African continent against Italian peninsula. Since this vineyard has a relatively young terroir, it is composed by a good percentage of sand and its wines have great floral and red fruits fragrances. San Pietro delle Viole was born 9/10 million years ago and it is the youngest Borgogno vineyard. As its name explain, San Pietro delle Viole, the Barolo has fragrant bouquet, recalling violets notes, always soft and open.
