Soil: calcareous and clayey marl

Wine training system: Archetto variation of Guyot system

Planting density: 4000 plants/ha

Grape harvest: September 26th - October 10th, 1996

Alcohol content: 13.50%

Serving temperature: 18/20 °C

Technical profile

Harvest: 1997 was an exceptional vintage in terms of climatic conditions. From January to May there were no precipitations except for some frost that thinned out the production. Variable weather in June, hot weather in July broken by frequent storms. Same weather for the first part of August and then good climatic conditions and hot sun till the end of November. Winemaking: regular fermentation and submerged cap maceration; racking off at the end of September. Ageing: four years in big Slavonian oak barrels. Bottling: May 2002.

Serving suggestion

Barolo Borgogno is one of the oldest Barolo produced following a classic and natural style. These precious bottles could have some sediment settled in the bottom, for this reason decanting the wine few minutes before the service is recommended.

Perfect pairing

We think it is wrong to recommend a "perfect" food - wine pairing, because everyone have their personal ideas and tastes. However we can suggest with whom it is perfect to drink this wine. With everybody!

Liste

Cannubi

Fossati

San Pietro delle Viole

It comes from all the estate's vineyards, five of the best Crus in Barolo area: Liste, Cannubi, Cannubi San Lorenzo, Fossati and San Pietro delle Viole. The first one, was born 11 million years ago from soil erosion, is composed by a completeness of micro and macro elements that combined together give to the wine peculiar characteristics of complexity and longevity. Cannubi and Cannubi San Lorenzo were born 12 million years ago from the sedimentation of the sea that occupied the Plain of the Po river, is the most famous and vicated Barolo Cru. They have an amazing complexity of terroir, formed by marly-calcareous soil and a very favorable climate and they give origin to wines with distinguished characters of elegance and longevity. Fossati vineyard was born about 10 million years ago from the sedimentation of the sea that occupied the Plain of the Po river after the push of the African continent against Italian peninsula. Since this vineyard has a relatively young terroir, it is composed by a good percentage of sand and its wines have great floral and red fruits fragrances. San Pietro delle Viole was born 9/10 million years ago and it is the youngest Borgogno vineyard. As its name explain, San Pietro delle Viole, the Barolo has fragrant bouquet, recalling violets notes, always soft and open.
